POINTSHARP

Pointsharp Authorization Robot Quick Check

Can AI help your SAP authorizations? Find out with our Authorization Robot Quick Check

If your SAP system is a few years old, you know the problem with constantly growing authorizations, copied users, new departments, and several other factors that make it hard to get a clear overview.

The Pointsharp Authorization Robot can help you automatically reduce roles, clean up your authorizations, and create an optimal authorization concept for your organization using iterative AI. We have developed the Authorization Robot Quick Check to determine if this is the right path for your organization.

Pointsharp Authorization Robot at a glance

Our Authorization Robot calculates the optimal authorization concept for your organization using best practice templates and thousands of iterations.

To get a quick overview of whether this solution can benefit your organization, we have developed a Quick Check that uses trace data from your SAP system to give you an idea of what could be achieved.

We collect up to four months of trace data, resulting in a presentation with your optimal SAP authorization concept. This eliminates unnecessary roles and authorizations, protects your system from misuse, and can help you ensure compliance.

Automate	Analyze	Act
Get an overview of your authorization concept automatically	Get a complete analysis and action plan to streamline your authorization concept	Future-proof your authorization concept and keep it updated with minimal effort

The Authorization Robot Quick Check contains:

- Up to 4 months of trace collection
- Sample calculation of the optimal SAP role concept for one to two departments
- Determination of the optimization potential in the Pointsharp lab
- Sample result list with anonymized data
- Final presentation, including recommended actions

We check everything for you

We will present the optimal authorization for your organization. This authorization considers your individual requirements and eliminates unused SAP authorizations in your company.

Our specialists draw on in-depth authorization knowledge and experience from previously successfully implemented projects.

With the Authorization Robot Quick Check, we combine what belongs together: intelligent software

with customized consulting. We check your outdated authorization concept and show you how to future-proof it.

In a presentation, we will demonstrate the optimal authorization concept for your organization. Our seasoned experts will also explain how the Authorization Robot can help you reduce roles, become compliant, and keep everything in check for the future.

With the Authorization Robot Quick Check, we combine our intelligent software with tailored consulting to show you how the authorization concept of the future could look in your organization.

Advantages

- Important findings for the increase of the overall security in the SAP system
- Low effort in checking the role assignments and contents
- Analyzing your historically grown authorization concepts
- Advice for further actions
- Minimal installation effort

Pointsharp is a European cybersecurity company that helps organizations secure authorizations, access, identities, and data in a user-friendly way. Security must be easy to use, and our vision is to give everyone access to a secure, modern digital workplace. We offer specialized IAM solutions tailored to meet the most demanding and specific needs.

We provide European-made cybersecurity software and services to clients around the globe. Our clients are often found in large enterprises that require exceptionally high levels of security and regulatory compliance, such as those in the financial, governmental, industrial, and defense sectors.

Our headquarters are located in Stockholm, Sweden, with offices in Germany, Denmark, Switzerland, and the Netherlands.
